Introduction

Himadri Specialty Chemical Limited operates within a complex and dynamic energy landscape. The Energy Management Policy has been developed in alignment with international best practices, including guidelines specified in ISO 50001. This policy ensures that the Company systematically evaluates and addresses its energy consumption patterns, sets measurable energy objectives, and targets, and establishes an energy management framework that fosters a culture of continuous improvement.

The company recognizes that energy is a crucial input in its manufacturing processes, which involve the production of a diverse range of products, including carbon black and specialty chemicals. The company's Energy Management Policy is designed to optimize energy utilization, enhance operational efficiency, and minimize environmental impact.

Objectives

Himadri adopt best available technologies to enhance energy efficiency with implemented world class operation practices to conserve energy and natural resources.

- Aims to optimize its energy consumption by implementing effective measures to ensure the efficient use of energy resources throughout its operations.
- Actively pursues innovative projects and initiatives that reduce energy demand, exploring new technologies and approaches to enhance energy efficiency and minimize consumption
- Himadri is dedicated to transitioning its energy sourcing towards renewable sources. By embracing clean and sustainable energy options, the company aims to reduce its carbon footprint and contribute to a greener energy future.
- The Company shall conduct energy audits every three years in accordance with the standards set by the Bureau of Energy Efficiency (Manner and Interval of Time for Conduct of Energy Audit) Regulations, 2010.
