We the Himadri are committed to the conservation of Natural Resources with a focus on continuous improvement and promoting sustainable industrial development. With a focus on continuous improvement.

Our aims to respond to any environmental challenges linked to its industrial output, by turning them into opportunities for innovation. This way, it contributes to a shared value system for all stakeholders, while also leveraging on circular economy practices.

Aims

Due to its scarcity and importance for life, Himadri Speciality Chemical has set the Objective to optimize the use of fresh water with a water balance which does not affect the ground water level and flow of rivers and streams.

- Reduce the specific consumption of fresh water per tonnage of production with optimize the fresh water consumption in supporting utilities.
- 100% Zero discharge strategy with recycling and reusing of processed water.
- Operate within full compliance of Environmental Law.

Objectives

1. Carrying out a periodic and systematic monitoring of its water consumption.
2. Maintaining desired water quality during procurement, processing, consumption and discharges
3. Innovation of technologies to reduction of fresh water in Boiler Operation.
4. Identify and rectification of the area to reduce steam energy losses in intermediate operation.
5. Use of Treated water in supporting functions and utilities.
6. Implementation of modern techniques in water treatment procedures.
7. Building the awareness of employees to optimize the fresh water uses in routine life.

We are focusing on water stewardship through conserving water, reducing freshwater withdrawal by recycling wastewater through Effluent Treatment Plants,
